

CLOUD SECURITY MANAGER

About CH-Resource Vietnam

Founded in 2014, CH Resource Viet Nam is a market-leading platform for access to Digital Super Wallet.

Headquartered in Singapore, we specialize in on-and-off ramp services for Digital Super Wallet with local currencies, and we are present in multiple countries across the Asia Pacific.

Our platform was founded by Singaporean entrepreneurs, and we are backed by prominent investors from Silicon Valley such as Tim Draper, Josh Jones, as well as established venture capital firms such as Boost VC.

Key Responsibilities

- Researching, analyzing and assessing threats and risks in a containerized public cloud environment; designing, developing and implementing security controls, in tandem with Infrastructure teams, to mitigate those risks.
- Take an active role in the configuration and maintenance of a diverse range of security tools, with a focus on cloud environments
- Performing day-to-day monitoring of container vulnerability management systems, assessing threat levels of detected issues and working with product teams to remediate them within established service levels.
- Designing and implementing automated security processes and controls to increase operational effectiveness and to reduce manual processes.
- Interfacing with infrastructure and other teams throughout the organization with the objective to provide high quality and low friction, security operations services and compliance with internal and regulatory security standards
- Preparing and documenting standard operating procedures.
- Acting as part of the incident response team providing troubleshooting, analysis and forensics when needed.
- Share knowledge on secure practices within the rest of the organisation.

Requirements

- 1+ years of experience in cloud security or related areas.
- Demonstrable experience designing and building security controls for public cloud environments.
- Practical experience managing and securing containers using tools like Docker and Kubernetes.
- Understanding of logging solutions such as Splunk, Graylog & syslog...
- Strong understanding of Linux PAM and SSH management.
- Has experience on Security Operation.
- Have experience in Cloud Workload Protection Platform and Cloud Security Posture Management.

Nice to have

- Familiar with and passionate about digital assets, its network and protocol.
- Able to code in multiple languages: Java, Scala, Golang, Ruby.
