

DevSecOps

About CH-Resource Vietnam

Founded in 2014, CH Resource Viet Nam is a market-leading platform for access to Digital Super Wallet.

Headquartered in Singapore, we specialize in on-and-off ramp services for Digital Super Wallet with local currencies, and we are present in multiple countries across the Asia Pacific.

Our platform was founded by Singaporean entrepreneurs, and we are backed by prominent investors from Silicon Valley such as Tim Draper, Josh Jones, as well as established venture capital firms such as Boost VC.

Key Responsibilities

- Design, implement, and maintain a secure and reliable cloud infrastructure platform. Work with other infrastructure team and DevOps to understand CI/CD process and integrate automation security solution to development process.
- Analyzing and collecting data/metadata from cloud systems (IAM, VPC, Cloud audit log...) to determine the abnormal behavior/traffic of cloud systems.
- Develop, optimize, and automate the build and deployment processes for the provisioning application, using security and cloud best practices.
- Secured containerized applications and Kubernetes clusters (Vulnerability, Hardening, Network Policies).
- Reviewing and addressing cyber-security issues as well as propose security solution and architecture.
- Performing research to stay abreast of new technologies and security vulnerabilities preferably in a distributed, cloud, or micro-service environment.

Requirements

- Have secured public cloud deployments for infrastructure and applications running on the public cloud: GCP, AWS.

- Experience with DevSecOps or DevOps, Continuous Integration & Continuous Delivery (CI/CD), and automated test tools such as Security Source Code, Jenkins, and/or Gitlab CI.
- Experience developing software or scripting with Bash, Php, PowerShell, Python or similar, ideally in an agile development environment.
- 1-2 years of ELK knowledge.
- 1-2 years of IT Security Operation.
- Have experience in Cloud Workload Protection Platform and Cloud Security Posture Management.
- Professional qualifications such as OSCP, SANS preferred.
- Competencies: Integrity, Collaboration, Delivery Excellent, Innovation
- Able to communicate by English.

Nice to have

- Familiar with and passionate about digital assets, its network and protocol.
- Able to code in multiple languages: Java, Scala, Golang, Ruby.
