

## QC ENGINEER

### About CH-Resource Vietnam

Founded in 2014, CH Resource Viet Nam is a market-leading platform for access to Digital Super Wallet.

Headquartered in Singapore, we specialize in on-and-off ramp services for Digital Super Wallet with local currencies, and we are present in multiple countries across the Asia Pacific.

Our platform was founded by Singaporean entrepreneurs, and we are backed by prominent investors from Silicon Valley such as Tim Draper, Josh Jones, as well as established venture capital firms such as Boost VC.

### Key Responsibilities

- Ensure quality and excellence of the product on various interfaces, including Web, Mobile and APIs.
- Work with the product team to establish quality parameters.
- Formulate plans to verify that products and features are working as expected.
- Read engineering design proposals for new features and provide suggestions about how and where to build in testability.
- Orchestrate the rapid testing and releasing of products/features.
- Write and maintain manual and automated tests to verify correctness of the feature/product.
- Investigate stack traces from monitoring and logging systems, and search the code base to find the correct owner for escalation.
- Collaborate on determining the root cause of a production defect, then pinpoint tests that need to be added to prevent similar defects in the future.

### Requirements

- At least 5 years in software development.
- At least 3 years of experience in developing automated test systems.

- Familiar with various testing tools, scripting languages, SQL, bash, basic system administration.
- Experience with Blockchain technologies at the transactional level.
- Organized and methodical, able to map the impact of software changes and plan tests to ensure correctness and prevent regression.
- Have experience in manual testing (Web/Mobile).
- Strong knowledge in APIs testing.
- Experience in Python is a bonus.
- Able to communicate by English.

### Nice to have

- Familiar with and passionate about digital assets, its network and protocol.
- Able to code in multiple languages: Java, Scala, Golang, Ruby.
